One India — Static Terms for Seller Network Participants

Buyer Network Participant: One India by Instastack (Just InstaStack Technology Private Limited). Subscriber id: buyer-ondc.instastack.io. Version 1.0.0, effective 14 October 2026. Domains: ONDC Retail, API contract v1.2.5 — Grocery (ONDC:RET10), Food & Beverage (RET11), Fashion (RET12), Beauty & Personal Care (RET13), Electronics (RET14), Appliances (RET15), Home & Kitchen (RET16), Health & Wellness (RET18).

These are the standard terms on which One India, as a Buyer App (BNP) on the ONDC Network, transacts with Seller Apps (SNPs) and the sellers they represent. They apply to every order placed through One India where the Seller App has accepted them (accept_bap_terms = Y in /on_search) and are referenced in /confirm. They sit under the ONDC Network Policy and the ONDC Network Participant Agreement; where they conflict, the Network Policy prevails.

1. Definitions

"Order" means an order confirmed through /confirm and /on_confirm. "Order value" means the quote total (quote.price.value) in /on_confirm, net of any later /on_update reductions. "Buyer" means the consumer using One India. "Seller" means the provider in the Seller App's catalogue who contracts with the Buyer. "PPF" means ONDC's Payment Protection Framework. "Return window" means the item's @ondc/org/return_window as sent by the Seller App.

2. Buyer App finder fee

One India charges the Seller App a buyer finder fee of 3 (three) percent of the order value, declared in every /search as buyer_app_finder_fee_type = percent, buyer_app_finder_fee_amount = 3, and repeated in /init and /confirm. The fee is exclusive of GST, which is charged on top at the applicable rate. The fee is earned only on orders that are delivered and not fully refunded; on a cancelled or fully refunded order no fee is charged, and on a partial refund it is charged on the amount the Buyer finally paid.

3. Payment collection and settlement

3.1 Prepaid orders: One India collects the payment from the Buyer (payment.collected_by = BAP) through its payment gateway. 3.2 Cash on delivery, where the Seller offers it: the Seller's delivery partner collects (collected_by = BPP); One India invoices the finder fee to the Seller App monthly. 3.3 Settlement of prepaid orders follows PPF: One India holds the Seller's share until the order is delivered and its return window has closed, and transfers it to the Seller App's settlement account within 2 working days after that, net of the finder fee, GST on the fee, and any refund made to the Buyer under sections 4 and 5. 3.4 Reconciliation is done through the ONDC recon / on_recon exchange (NTS10 context) for every settled order; a differing figure is reconciled within 7 working days of the on_recon. 3.5 TCS and TDS are deducted and deposited as the Income-tax Act and the CGST Act require, with certificates issued in the usual course. settle / on_settle are not used.

4. Cancellations

4.1 A Buyer may cancel before the Seller marks the order Packed, for items the Seller has marked cancellable, with the reason codes of the contract; the Buyer is refunded the order amount. 4.2 A Seller may cancel an order only for the reason codes the contract allows, and must do so before packing wherever possible; the Buyer is then refunded in full, including any payment fee. 4.3 An order not accepted within the TTL of /confirm, or not delivered because the Seller or its logistics could not fulfil it, is treated as a Seller cancellation. 4.4 Where a Seller cancels, the Seller App bears any cancellation or logistics charge; One India does not charge a finder fee on a cancelled order. 4.5 Return-to-origin on a Buyer's refusal at the door is charged as the Seller App's quote states in /on_cancel.

5. Returns and refunds

5.1 An item may be returned if the Seller has marked it returnable (@ondc/org/returnable) within its return window, through /update with the contract's return reason codes; the Seller approves or rejects with a reason within 24 hours. 5.2 Refunds to the Buyer for a return, a cancellation or a shortfall are initiated by One India to the Buyer's original payment method as soon as the Seller App confirms the refund amount (/on_update, /on_cancel), and the amount is deducted from the Seller's settlement for that order or, if already settled, from the next settlement. 5.3 For cash on delivery the Seller refunds the Buyer directly and reports it in /on_update.

6. Issues and grievances

Issues raised by Buyers are sent over ONDC IGM 2.0.0 (/issue, /on_issue). The Seller App acknowledges every issue within 48 hours and proposes a resolution within 30 days; One India acknowledges Buyer complaints within 48 hours and aims to close them within one month as the Consumer Protection (E-Commerce) Rules require. An unresolved issue may be escalated by the Buyer and, failing resolution, taken to ONDC's online dispute resolution.

7. Catalogue, pricing and conduct

The Seller App warrants that catalogue data it sends is accurate, that prices include all taxes, that mandatory statutory details (Legal Metrology, FSSAI where applicable) are present, and that the Seller holds the licences its goods require. One India shows search results on the terms of its published disclosures on listing criteria and sorting parameters, without preference between Seller Apps.

8. Liability and disputes

8.1 One India's liability to a Seller App for any order is capped at the finder fee for that order; a Seller App's liability to One India for an order is capped at twice the order value. 8.2 Neither party is liable for indirect or consequential loss. 8.3 Disputes are first referred to the ONDC dispute process; there is no mandatory arbitration. 8.4 Indian law applies; courts at Thane, Maharashtra have jurisdiction.

9. Changes to these terms

One India may issue a new version by sending static_terms_new and effective_date in /search at least 15 days before it takes effect; the Seller App accepts or declines in /on_search. The current and previous versions are kept at ONDC-Official/static-terms (RET/OneIndia) and at the link in /search.
