These static terms are drafted per the ONDC Model Static Terms — Retail Transaction v1.0. They are hosted at a stable URL and mapped to the `static_terms` attribute in the transaction-level contract (TLC). Together with the per-transaction API payload (`Confirmation`) they form the contract between the Buyer App and the Seller App for a given transaction. Where a per-order `Confirmation` attribute (e.g. an item marked cancellable) conflicts with these static terms, the Confirmation prevails.

Preamble

These static terms are published by Glydio in its capacity as a Buyer Network Participant (BNP / Buyer App) on the ONDC Network. They set out the standing terms on which Glydio transacts with Seller Network Participants ("Seller App") and, where applicable, Logistics Service Providers, and supplement the ONDC Network Participant Agreement and ONDC Network Policy. The Seller App avails Glydio's services to be discovered by and to fulfil orders placed by Buyers. The Parties are independent and are individually a "Party".

1. Definitions

Capitalised terms not defined here have the meaning in the ONDC Network Policy or ONDC Network Participant Agreement.

1.1 Business Day — a day other than Saturday, Sunday or a public holiday declared by the Government of India, the State Government or any Competent Authority. **1.2 Confirmation** — the terms and conditions exchanged between the Parties over the ONDC Protocol for a transaction (the `select / init / confirm` payload and `bpp_terms`). **1.3 Delivery** — (a) collection of the Shipments by the Party procuring logistics from the agreed location(s); and (b) delivery of such Shipments to the Buyer at the location designated by the Buyer. **1.4 Order** — all purchases made by the Buyer on the ONDC Network through the Buyer App, Seller App, Seller, Gateway and Logistics Service Provider, as applicable. **1.5 Product(s)** — the products and/or services made available by the Seller App, including any related deal/gift card/gift voucher/electronic code. **1.6 Settlement Window** — the number of Business Days from collection, shipment, delivery or end of the Return Window, as provided in the Confirmation, within which the Parties settle amounts owed to each other. Glydio's default Settlement Window is **T+1 Business Day** from delivery unless otherwise agreed in the Confirmation. **1.7 Shipments** — Products consolidated and packaged together and handed over to the Party procuring logistics or to a Logistics Service Provider. **1.8 ETA** — Estimated Time of Arrival communicated by the Seller App to the Buyer App in the configurable terms of the TLC. **1.9 Hyperlocal** — Delivery within city/town limits. **1.10 Intercity** — Delivery beyond city/town limits. **1.11 OFD** — Order for Food Delivery products (e.g. F&B items prepared on order). The Seller App must communicate whether the item is non-cancellable; if marked cancellable in the Confirmation, that attribute prevails over these static terms. **1.12 Non-OFD** — Order other than OFD or Made to Order (e.g. Fashion, Electronics, Beauty) — products manufactured/produced without awaiting the buyer's order. **1.13 Made to Order** — an Order that is not OFD but is for a product prepared/procured after the buyer's order (e.g. customised prints, fresh meats packed

per order, customised F&B). The Seller App must communicate whether the item is non-cancellable; if marked cancellable in the Confirmation, that attribute prevails. 1.14 **Quality Issues** — including quantity mismatch, expired/damaged/defective/spoiled products, packaging issues, wrong items, missing items, etc. 1.15 **RTO** — Return To Origin: where, post-shipment, an order is not delivered to the customer for any reason and is returned to the seller's address. 1.16 **Buyer Cancellation** — cancellation or cancellation requests by the buyer, including refusal by the buyer to accept delivery.

3. Cancellation (Post-Shipment)

Post-shipment cancellation may be initiated by the Buyer/Buyer App only by: (i) non-receipt/non-acceptance of the product on attempted delivery; or (ii) an issue raised over IGM for refund (e.g. delay) accepted by the Seller/Seller App while delivery is pending. 4. Refund / Return / Replacement (Post Delivery)

Order Type	Case	Resolution

Non-OFD (Returnable / Non-Returnable)	Marked delivered but never delivered	Joint investigation as above; liability follows the source of the issue.
Non-OFD	Quality Issue	Glydio provides resolution to the buyer per the Seller App's remarks (basis investigation).

Notes. (1) If Glydio chooses to provide the buyer a resolution not proposed by the Seller App, the additional cost of such resolution is borne by Glydio exclusively; the Seller App receives the amount specified post adjustment per the resolution it proposed. (2) Where the Seller App provides a refund, it may do so with or without pickup of the delivered product; where refund is with pickup, the Seller App may confirm the refund post pickup from the buyer.
